Professional Experience

Saudi Aramco, Dhahran, Saudi Arabia
Senior HSE Professional

6/2011 – 5/2022

Offer valuable guidance and advice to the organization aimed at ensuring compliance of all health, safety, and environmental standards. Develop continuous interactions with department employees at all levels within the company to streamline HSE matters. Communicate with associated company entities including Loss Prevention Department, Environmental Protection Dept., Johns Hopkins Aramco Healthcare, Contracting Dept., and Community Services.

- Ensured smooth running of company operations by establishing relationship with all levels of management including senior vice president, vice president, department managers, division heads, and supervisors.
- Minimized potential hazards by formulating detailed recommendations for corrective actions based on reviews and analyses of injury, property damage, and statistical loss data.
- Drove 100% increase in incident reporting transparent across organization annually by leveraging ardent leadership and management approaches.

Shaw Group, Inc., Cliffside, North Carolina
EH&S Program Manager

7/2009 – 6/2011

Spearheaded overall operations related to the company and client's environmental, health, and safety programs. Identified training needs and organized effective safety trainings for all employees. Interfaced with the job superintendent to ensure seamless execution of work as per all site-specific environmental and safety policies. Oversaw subcontractor compliance with applicable site, client, and federal EH&S requirements.

- Commended by the top management and achieved OSHA recognition as VPP Star sites on different projects.
- Received promotion 3 times in five-year period for superior competency, communication, and safety performance.
- Led overall administration of workers' compensation claims from initial report, investigation through claim closeout.

Shaw Group, Inc., Lena, Louisiana
EH&S Manager

2/2008 – 7/2009

Delivered valuable suggestions to employees regarding hazardous conditions/concerns or near miss incidents. Conducted EH&S assessments of the site on a regular basis to avoid any incident. Scheduled and implemented safety training for all employees as well as conferred with site management to drive proper execution of work.

- Championed conduction of incident investigations to analyze key factors; recommended the corrective measures to prevent reoccurrence.
- Interpreted EH&S regulations and requirements for site and provided appropriate means to achieve compliance.
